Auralis (Sonora) Admin Dashboard Specification

Dashboard Layout
After logging into the admin dashboard, the admin will see a left-side navigation sidebar and a main content area. The dashboard should use a dark black background with light-toned widgets inspired by the main site's Neobrutalism theme.

1. Overview Section
The Overview section displays: Total number of songs on the platform Total number of users Total number of active devices Total number of queries Total number of forms available The Overview item contains an expandable arrow. When clicked, it expands vertically and displays the above statistics as separate submenu items.

2. Total Users Section
Displays a searchable list of all users with the following information: User profile picture User name Unique User ID Email used for login Password field (if user signed in with Google, display: N/A (Google)) Date joined Number of devices Artist account status (Yes / No) Badges Account status
Device Display Logic:
T = Total logged-in devices
C = Current active devices
Devices inactive for 30 days are automatically logged out. When hovering over or clicking T, the admin can view all devices and their unique IDs. When hovering over or clicking C, the admin can view all currently active devices and their unique IDs. **Badge Types:** Owner Badge Admin Badge Artist Badge No Badge **Status Types:** Normal Full Account Suspended Artist Account Suspended This section is view-only and does not allow editing.

3. Edit User Section
The admin enters a User ID to access full editable user details. The admin can: Edit user name Edit email Edit password Manage devices Log out devices Suspend devices View device unique IDs **Artist Account Controls:** View artist profile View all released songs View song-specific views View total artist views Delete songs Suspend songs Ban songs Suspend artist account Ban artist account Delete artist account **User Controls:** Edit badges Suspend account Delete account permanently Send custom personal messages to the user
